

SECTION XI

To assure safe and healthful working conditions for working men and women; . . . by providing medical criteria which will assure insofar as practicable that no employee will suffer diminished health, functional capacity, or life expectancy as a result of his work experience; . . . by providing for training programs to increase the number and competence of personnel engaged in the field of occupational safety and health; . . .

—Public Law 91-596, Occupational Safety and Health Act of 1970.

SOURCES OF CONSULTATION

William R. Lee, M.L.S.

Following a review of the pertinent literature, the investigator may still feel the need for expert consultation owing to the often difficult task of identifying an occupational etiology with a patient's illness. This section identifies various official and nonofficial agencies to which the health professional may turn for advice on occupational health. It includes international organizations, Federal and other national agencies, state and local agencies, and schools of public health.

There are certain nonofficial agencies and organizations not given here, in particular insurance companies (especially those issuing workers' compensation insurance policies) and professional groups engaged in private consultation. Information about these latter organizations may be found under Directories in the Reference Aids portion of this section.

For a complete listing of state and local sources, refer to NIOSH's annual *Directory of Governmental Occupational Safety and Health Personnel* which gives a complete listing of state and local agencies.
